

1. Organization Overview

Organization Name

Football Ultimate Hub (FUH)

Brief History

Football Ultimate Hub is a football-focused website created to provide football fans and EA Sports FC Ultimate Team players with a central platform for football-related information and content. The website allows users to explore player information, Ultimate Team content, football images, stadiums, trophies and other football-related media.

Mission

To provide football fans with an easy-to-use online platform that delivers useful football content, player information and Ultimate Team resources.

Vision

To create an enjoyable and informative football platform with an attractive design, useful content and simple navigation.

Target Audience

- Football fans
- EA Sports FC Ultimate Team players
- Teenagers and young adults
- Casual and competitive gamers

2. Website Goals and Objectives

For your FUH proposal, you can use this:

The website aims to:

- Provide football-related information and content.
- Introduce users to Football Ultimate Hub and its purpose.
- Showcase football players and player-related information.
- Provide information about building a balanced Ultimate Team squad.
- Display football-related images and video content.

- Provide information about stadiums, trophies and football crowds.
- Create an attractive and professional football-themed website.
- Make navigation between the five pages simple and clear.
- Provide users with contact information.

Current Website Analysis

Football Ultimate Hub is a newly developed website, so there is no existing website to analyse. The website was developed from scratch based on the organisation's goals, target audience and proposed features. The design focuses on creating a football-themed, user-friendly and visually appealing website with clear navigation between the five main pages.

4. Proposed Website Features and Functionality

For your proposal, use this:

Proposed Website Features and Functionality

Football Ultimate Hub will consist of five main pages designed to provide users with football-related information and content. The website will include clear navigation and interactive media to create an engaging user experience.

The website will include:

- **Home Page** – introduces Football Ultimate Hub and welcomes users.
- **About Us Page** – explains the purpose and background of FUH.
- **Services Page** – provides information about the football and Ultimate Team content offered.
- **Gallery Page** – displays football-related images and video content.
- **Contact Us Page** – provides contact information for users.
- **Navigation Menu** – allows users to move between all five pages.
- **Football Images** – used throughout the website to support the content.
- **Player Content** – showcases football players.
- **Ultimate Team Content** – includes information about building a balanced squad.
- **Interactive Gallery** – allows users to click images to view related information.
- **Video Content** – provides additional football-related media.

5. Design and User Experience

For your FUH proposal, you can use:

Colour Palette

The website uses a football-inspired colour scheme consisting of:

- **Black**
- **Dark blue**
- **Blue**
- **White**

These colours were chosen to create a modern, professional sports-themed appearance.

Typography

The website uses clear and readable typography so that users can easily read the information and navigate the website.

Layout

The website uses a football/sports-inspired layout containing:

- A navigation bar
- FUH logo
- Main content sections
- Football images
- Gallery
- Video content
- Footer

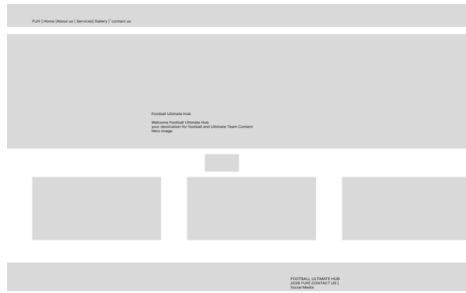

User Experience

The website is designed to be simple and easy to navigate. Users can move between the five pages using the navigation menu and interact with content on the Gallery page.

Low-Fidelity Wireframes

Low-fidelity wireframes were developed to visualise the **layout and information hierarchy** of the website before development. The wireframes helped plan the structure and placement of content on the five main pages: Home, About Us, Services, Gallery and Contact Us.

Home page

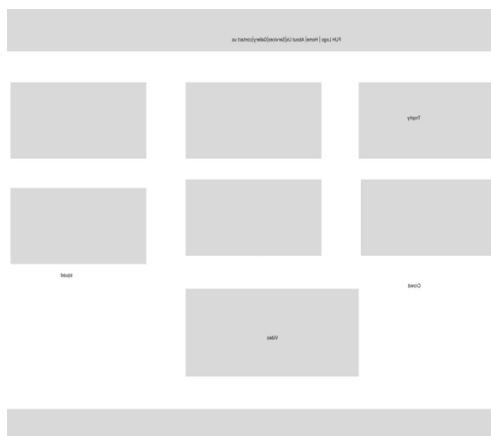

About Us page

Services page

Gallery page

Contact us page

6. Technical Requirements

Languages

- **HTML** – used to create the structure and content of the website.
- **CSS** – used to style the website, including colours, layout, navigation and images.
- **JavaScript** – used for interactive functionality where required.

Development Software

- **Visual Studio Code** – used to write, edit and organise the website code.

Design Software

- **Canva** – used for creating or editing visual content.
- **Figma** – used for planning and creating the low-fidelity wireframes.

Website Assets

- Football images
- FUH logo
- Football video
- Other visual content used throughout the website

7. Timeline

Week 1 — Research and Planning

- Research and content gathering

- Proposal development
- Collection of images and media
- Low-fidelity wireframe planning

Week 2 — HTML Development

- Development of the five HTML pages
- Website structure and navigation
- Adding content, images and multimedia

Week 3 — CSS Styling

- Website layout and styling
- Black and blue colour scheme
- Navigation styling
- Gallery and image alignment
- Improving the overall appearance

Week 4 — Remaining Development and Project Completion

- Complete any remaining functionality
- Website testing and debugging
- Complete **Part 2**
- Complete **Part 3**
- Final adjustments
- Final submission
- **Budget**
- The estimated budget for Football Ultimate Hub is **R850**. This includes approximately R250 for the domain and R600 for website hosting. Canva, Figma and Visual Studio Code can be used at no cost for this project.
